Title: Why You Think You're So Smart (But You're Not)
Topic: Dunning-Kruger effect
Full Narration
Hey everyone! Have you ever thought you're way smarter than you actually are? That's the Dunning-Kruger effect. It's when people who lack knowledge in a subject overestimate their competence. For example, someone who's new to coding might think they're an expert because they can barely write a simple program. The cool thing? People who know less tend to be worse at judging their own skills. This isn't about being lazy—it's about cognitive bias. Remember: confidence without skill is a trap. Don't let your confidence blind you to what you don't know.
Takeaway
Confidence without skill is a trap—always check your knowledge before you claim expertise.

Copy the complete image prompt for each scene, generate your illustration, and upload it below.

📋 Master Illustration Prompt

```
Create minimalist, hand-drawn black stickman illustrations
on a pure white background.

VISUAL STYLE:

- 9:16 vertical composition.
- Simple black line art.
- One consistent stickman character throughout all images.
- Round head, simple facial features, thin black limbs.
- Clean, smooth strokes with consistent line thickness.
- Minimalist editorial illustration aesthetic.
- Large amounts of white negative space.
- Use simple visual metaphors where appropriate.
- Keep the main character centred and clearly visible.

STRICT RESTRICTIONS:

- No colours other than black and white.
- No text, letters, numbers, typography or captions.
```
